

# AVIAtest Sample test

## Part 1 – Introductory interview (Duration: approx. 5 minutes)

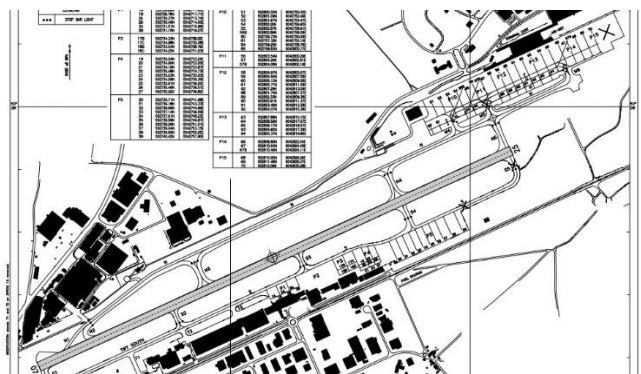

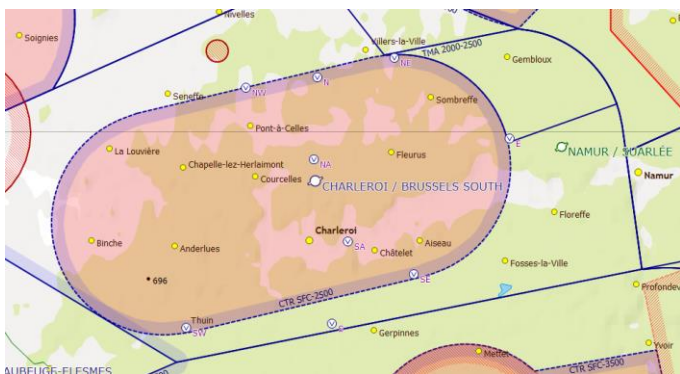

A short interview focused on you and your experience in aviation.

Example:

- When did you start your career in aviation?
- Which airplanes do you have experience with?

## Part 2 – A simulated flight (VFR/IFR) (Duration: approx. 5 minutes)

Each candidate is given an aerodrome and area chart according to his choice of assessment – either for a VFR or an IFR flight. The interlocutor simulates flight conditions and the candidate is asked to perform a flight using correct phraseology.

## Part 3 – Listening comprehension (Duration: approx.. 5 minutes)

The candidate will listen to two recordings – an ATIS and a an extract of an announcement or conversation regarding an aviation-related topic. Prior to each recording, two questions for each of the recordings will be asked. The candidate is allowed to take notes. Each recording will be played once. After each recording, the candidate will answer the respective questions.

The audio samples are available to download from our website [www.aviatest.eu](http://www.aviatest.eu).

Audio sample 1: What is the temperature?

Audio sample 2: What is the destination of the flight?

## Part 4 – A follow-up discussion on aviation-related topics (Duration: approx.10 minutes)

The candidate will be asked follow-up questions based on unusual situations encountered in the previous parts of the exam on various aviation-related topics (communication, weather, navigation, emergency situations, wildlife, medical emergency...). No technical knowledge is required.

Example:

- What do you think are some of the causes of miscommunication between controllers and pilots?
- How would you as a pilot react to a medical emergency on board your aircraft?
